Brainz (Pty) Ltd

Brainz (Pty) Ltd (‘Brainz’) was formed in 1991 by two young professionals, Steve Smith and Horatio Adams, with the aim of providing advice to companies in southern Africa on general economic and financial issues. Mr Smith and Mr Adams are the joint chief executive officers of Brainz.

Over the last 19 years Brainz has grown and changed significantly and now comprises a head office and three wholly-owned subsidiary companies. The group also has an investment in an associate company. The group offers a broad array of products and services. The shareholdings in and group structure of Brainz (Pty) Ltd are set out in appendix A (separate handout).

For some time now the shareholders of Brainz have considered listing the group on the Johannesburg Securities Exchange (JSE). Although the economic downturn has delayed the potential listing, the directors of Brainz have been taking steps to improve the general state of corporate governance within the group.

Brainz has nine directors in total, of which five are executive directors. Four of the executive directors of Brainz serve as chairmen of the Brainz associate and subsidiary companies. The four non-executive directors are appointed by the Smith and Adams family trusts. Brainz pays market-related fees to all its directors.

The board of directors meets twice a year to approve the annual budgets and governance frameworks for the group companies, to consider reports from the audit committee (which is the only subcommittee of the board) and to decide on strategy.

All Brainz directors and all the directors of the subsidiary companies participate in a cash-settled phantom share option scheme. Tranches of phantom shares are notionally awarded to scheme participants every year, at a price based on a pre-determined discount to the prevailing JSE average price-earnings (PE) ratio for the Support Services Sector. These phantom shares vest over a two-year period, after which the shares are revalued using the current average Support Services Sector PE ratio. Thereafter participants can elect to exercise the notional share options, in which case the company settles the difference between the initial valuation and the newly determined share price.

At present the tranches of share options granted on 1 January 2009 and 1 January 2010 are under water (that is, out of the money) and the board of directors of Brainz is concerned that this will have a negative impact on the directors of the group companies. Accordingly, the board is considering revising the initial allocation prices of the options by increasing the pre-determined discount factor.

The current chairman of the board, who is also the chairman of the audit committee, is retiring in December 2010. The board is considering paying a gratuity of R5 million to the outgoing chairman in recognition for his work in providing superior strategic leadership during his tenure.
Brainz Services (Pty) Ltd

Brainz Services (Pty) Ltd (‘Services’) provides information technology, group reporting, internal audit, legal and treasury services to the Brainz group, as well as advice on funding, risk management and debt collection.

The internal audit function has a total staff of six and is led by the former chief executive officer of Brainz Learning (Pty) Ltd, Nigel Herd. Internal audit staff visit each of the Brainz subsidiaries at least once a year and conduct compliance-based audits to ensure that the internal control systems are operating effectively. To maintain independence Mr Herd has direct access to the external group auditors and reports directly to the chairman of Brainz. Mr Herd is the only other member of the Brainz audit committee.

Brainz Advisory (Pty) Ltd

Brainz Advisory (Pty) Ltd (‘Advisory’) forms the core of the Brainz group and provides a full range of economic and financial advisory services to clients in southern Africa.

Advisory currently employs 196 full-time consultants and a number of contract workers. Advisory works on a project basis and, depending on the nature of each particular assignment, sources a mix of own employees and contractors to undertake each project.

Advisory uses proprietary methodologies which are sourced from IQ International Inc. (‘IQ’), an American research institute. IQ charges a fixed quarterly US dollar royalty for access to their methodologies.

Advisory benchmarks its marketing activities against a carefully selected group of benchmark partners who compete in the same market. The September 2010 Advisory management accounts reflect the following benchmarked marketing measures:

(a) Percentage of total revenue sourced from existing clients (that is, clients for whom work has been undertaken previously):

<table>
<thead>
<tr>
<th>Year</th>

<tr>
<td>2010YTD</td>
<td>46%</td>
<td>66%</td>
</tr>
</tbody>
</table>

Advisory markets its services through the following channels:

- The Brainz executive directors who spend significant time networking and developing new contacts in order to source opportunities;
- Direct referrals from any third party, for which Advisory pays 2% of the quoted fee on project presentation to a potential client, and if successful, a further 2% at project inception; and
Umfolozi (Pty) Ltd ('Umfolozi'), which is wholly owned by three black lawyers and tenders for public sector assignments in its own name. When a tender is awarded to Umfolozi, it immediately subcontracts the assignment to Advisory, which in turn pays Umfolozi 7.5% of the total quoted revenues for handing over the assignment.

Extracts from the audited 2008 and 2009 annual financial statements and related ratios, and from the latest forecast results and ratios for 2010 (based on the year to date (to September 2010) plus the forecast for the remaining three months), for Advisory are as follows:

<table>

**Notes**

1. Gross revenue represents estimated billings to clients which are debited to work in progress, including billing to group companies, based on monthly employee and contractor time sheets at an average standard charge-out rate per hour, which is determined annually in advance.
The 2010 standard charge-out rate and those used in the 2009 and 2008 years are as follows:

<table>
<thead>
<tr>
<th>Charge-out rate per hour</th>
<th>2008</th>
<th>2009</th>
<th>2010</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>R1 800</td>
<td>R2 100</td>
<td>R2 400</td>
</tr>
</tbody>
</table>

2 Advisory makes a general provision of 3% of gross revenue against work in progress. If necessary additional amounts are written off at the point of final project invoicing to clients when work in progress is transferred to trade receivables.

3 Employment costs represent the cost to the company of its own employees as well as all amounts paid to contractors. In the last two years Advisory has aggressively followed a strategy of shifting its employment profile to more highly qualified professionals, and at present more than 90% of professional employees have at least a masters degree.

Relevant details of employment costs are as follows:

<table>
<thead>
<tr>
<th>Weighted average number of full-time employees</th>
<th>31 December 2008</th>
<th>31 December 2009</th>
<th>31 December 2010</th>
</tr>
</thead>

</tbody>
</table>

6 With effect from 1 January 2007 Advisory entered into an eight-year lease agreement with Xtreme Properties Ltd for the provision of rental office space in all the major cities in which Advisory operates.

7 Office administration costs include all costs of the accounting, legal and human resource functions as well as intercompany charges from Services.

8 Interest is paid at prime plus 3% on both the bank overdraft from MBR Bank and loans from shareholders. In 2009 MBR Bank became increasingly concerned about the extent of
its exposure to Advisory, despite having a cession of trade receivables, and insisted that the overdraft facility be reduced to R65 million by 30 September 2010.

9 Sundry income represents receipts from Brainz Learning (Pty) Ltd for the provision of training material.

10 Ratios are based on gross revenue.

**Brainz Learning (Pty) Ltd**

Brainz Learning (Pty) Ltd (‘Learning’) offers a number of generic training courses in finance and economics. Learning has consistently yielded the highest return on equity of all the companies in the Brainz group.

Learning is run by a small group of people which provides leadership and handles all marketing and course administration activities. The copyright of each of the training courses vests in Advisory and Learning pays Advisory a fixed rate of 50% of all attendance fees for the use of the training materials. Learning has exclusive rights to all Advisory courses until 2018.

The presentation of training courses is outsourced to freelance lecturers who are contracted as and when needed. The frequency with which individual training courses are offered is determined by the response rates to the various marketing initiatives. Courses are presented in all major centres in South Africa, Botswana, Namibia and Zambia at venues which are hired specifically for each course.

Training course evaluations indicate that Learning is one of the foremost training companies in southern Africa and that the calibre of the administration, training materials and teaching personnel is of the highest order.

**Smile Inc.**

Smile Inc. (‘Smile’) offers a member-based internet dating service. Members pay a monthly fee of US $10 to Smile for access to the portal and to list their personal attributes, including photographs if they wish to do so. Smile also matches each member with potential partners using a patented mathematical algorithm that predicts compatibility based on 25 different variables.

Smile was incorporated in January 2008 and is registered in the Bahamas, a tax-free haven. The initial shareholders were the Smith Family Trust (45%), Adams Family Trust (45%) and Algiers Adams (10%). Algiers Adams is the managing director of Smile and is the son of Horatio Adams. Smile has to date spent US $3 million on developing its business and marketing its site to potential members.

The Smile website is hosted by Services. The portal development activities have been outsourced to Whale Computing (Pty) Ltd (‘Whale’), which also owns the patented mathematical algorithm that Smile uses to match potential partners. Whale was wholly owned by Advisory until August 2010 when it sold 100% of the shares in issue to a third party. The sale of shares agreement provides for profit warranties for a three-year period. Advisory used the initial proceeds on the sale of shares in Whale of R35 million to reduce its overdraft. If Whale achieves its profit targets, Advisory is set to receive a further R30 million in three years’ time.
Brainz acquired a 40% shareholding interest in Smile in December 2009 from the Smith Family Trust and the Adams Family Trust for an aggregate consideration of US $12 million.

Brainz requested Algiers Adams to perform a valuation of Smile at 30 September 2010 with the intention of revaluing its investment in its financial statements for the year ending 31 December 2010. Extracts from the valuation performed by Algiers Adams are set out below:

<table>

</table>

Notes

1. Smile’s internet dating service had 63 250 members at 30 September 2010. Smile expects membership numbers to increase to 271 520 in the 2011 financial year. Monthly membership fees are forecast to remain at US $10 per month for the foreseeable future.

2. Smile signed up its first advertiser on the portal in September 2010 for an annual fee of US $59 000. Given the expected increase in members over the next three years, Smile expects to derive significant revenue from selling advertising space on its website.

3. Smile incurred an operating loss of US $17 000 for the year ended 30 September 2010. Algiers is convinced that Smile will exceed the profit projections, as membership numbers are increasing significantly on a month on month basis.

4. The forecast operating expenses are based on the assumption of a reduction in the following expenses:
   - A 20% reduction in the website hosting fees currently charged by Services. Smile currently pays a variable fee of US $2 per member per month to Services. Algiers Adams assumed that there would be no annual increase in fees after the reduction has been negotiated; and
A 20% reduction in royalties payable to Whale. Smile presently pays Whale a fixed annual fee of US $5 million. Algiers Adams assumed that there would be no annual increase or decrease in the royalty fee payable from 2011 onwards.

5 Algiers has assumed that the annual EBITDA is equivalent to the free cash flow.

6 A weighted average cost of capital (WACC) of 20.4% has been used to discount future cash flows. WACC has been derived on the basis of the following:
   - A target capital structure of 20% equity and 80% debt;
   - A cost of equity of 30%; and
   - A cost of debt of 18% per annum with no tax relief.

7 The terminal value has been estimated based on an annual growth in cash flows of 5% into perpetuity.

You may assume that the mathematical calculations of Algiers Adams to discount future cash flows and determine the terminal value are correct.
